PROFESSIONAL SUMMARY

Unity Developer with 4+ years of hands-on experience designing and shipping mobile games across casual, mid-core, and hypercasual genres. Proven ability to lead small development teams (3–4 members) from concept through live launch. Skilled in the full Unity pipeline — from physics, animation, and UI systems to build pipelines and asset bundles — with a strong focus on player experience and performance optimization.

WORK EXPERIENCE

Unity Developer / Team Lead

2022 – Present

Mobile Game Studio

- Led a team of 3–4 developers to design and ship multiple mobile titles on iOS & Android.
- Architected Unity game systems: state machines, object pooling, save/load, UI frameworks.
- Implemented gameplay mechanics for mid-core Puzzle RPG, gacha systems, and merge-loop progression.
- Managed sprint planning via Jira and version control workflows with Git.
- Optimized build pipelines and asset bundle strategies to reduce load times and APK size.

Unity Developer

2020 – 2022

Game Development

- Developed casual and hypercasual games using Unity 2D with C# scripting.
- Implemented 2D animations, physics interactions, and level progression systems.
- Integrated third-party SDKs (ads, analytics, in-app purchases) for mobile monetization.
- Published indie prototypes on itch.io for community testing and feedback.

PUBLISHED PROJECTS

Waifu Battle

MID-CORE · PUZZLE RPG

Real-time combat mobile game featuring character progression, gacha mechanics, and strategic team-building. Handled core battle system architecture, UI, and monetization integration.

Sticker Merge

CASUAL · MERGE

Polished casual merge game with satisfying progression loops and collection mechanics. Focused on smooth UI animations, retention features, and idle loop design.

Grill Sort

CASUAL · PUZZLE

Sorting puzzle game with escalating challenge and clean visual design. Designed and implemented core puzzle logic, level data structures, and progression system.

Hypercasual Mini Games

HYPERCASUAL · COLLECTION

Collection of hypercasual prototypes published on itch.io, demonstrating rapid prototyping ability across multiple game mechanics and art styles.
