WORKFLOW

- Git — Version control
- Jira — Sprint planning
- Trello — Kanban
- Claude Code — AI dev

EDUCATION

- 2014-2018 National Economics University
Bachelor's Degree
- 2016-2018 FPT Aptech
Software Development ·
Programming & Engineering

ABOUT ME

Unity developer with **4+ years of experience** specialising in **casual** and **mid-core** mobile games. I've led and managed teams of **3-4 people**, driving projects from concept to ship. I care about tight game feel, clean code architecture, and smooth team collaboration using agile tools and AI-powered workflows. Every project I ship is designed to keep players coming back.

PROJECTS

- 01 Waifu Battle

youtube.com ↗

Mid-core

Battle

Unity

C#

A mid-core battle game with collectible characters, each with unique skills. Features real-time combat, character progression, vivid 2D animations, and an addictive gacha-style loop.

 Real-time combat system

 2D character animations

 Progression & gacha loop
- 02 Sticker Merge

youtube.com ↗

Casual

Merge

Unity

C#

A satisfying casual merge game where players combine stickers to discover new ones. Polished merge animations, clean UI, and a well-tuned progression loop keep players engaged session after session.

 Smooth merge mechanic

 Polished UI/UX

 Engaging progression loop
- 03 Grill Sort

youtube.com ↗

Casual

Puzzle

Unity

C#

A satisfying casual puzzle game where players sort grilled items to the correct plates. Simple one-tap mechanics, colorful visuals, and escalating levels deliver an addictive pick-up-and-play experience. Live on Google Play.

- 04 Hypercasual Mini Games

drakan1701.itch.io ↗

Hypercasual

Mini Games

Unity

itch.io

A collection of fast, fun hypercasual games published on itch.io — each exploring a distinct mechanic. Simple to pick up, hard to put down.
